

Self Introduction ? (5mins)

Name :

Experience :

Company Name :

Education :

Projects worked on :

Roles and Responsibilities :

Achievements and Hobbies :

Project explanation : (Current project-15-20mins)

Name :

Domain :

Duration :

Reason for development of project :

No.of modules present in project :

No.of modules worked on :

Project explanation : All modules in project

a.Domain and Project

b.Domain || Project

c.Project

Shall i explain my modules ?

Question will be completely on current project

Agile Question : (Current project)

1)How many Releases have you given ?

2)How many build have your tested ?

3)How many sprints you had in a release ?

4)What was the duration of release ?

5)What was the duration of every sprint ?

6)How many test cases can you write in a day ?

7)How many test cases can you execute in a day ?

8)How many defects have you found on project ?

9)How oftenly you used to get build ?

10)How many test cases have you written on your project ?

11)How many total no.of test cases you had on you or project ?

12)How many total defects you had in your project ?

13)In one release how many sprints you had ?

14)What was the duration of project ?

15)How mant test cases can you review in a day ?

16)From which release you were invovled in your project ?

17)Count of Blocker/Critical/Major/Minor defect count ?

- 18)How many test cases can you automate in a day ?
- 19)How many builds have you automated ?
- 20)How oftenly you got build for automation ?
- 21)On how many builds have you run scripts ?

Question on Tool :

- 1)How you handled Agile in your company and which tool you used to handle ?
- 2)How to write test cases in ALM/QC/Test rail ?
- 3)How to execute test case in ALM/QC/Test rail ?
- 4)How to log defect in ALM/QC/Jira ?
- 5)How to generate report in ALM/QC/Test rail ?
- 6)What are the status of defect in ALM/QC/Jira/Backlog/Mantis ?
- 7)What are the status of execution in ALM/QC/Test rail ?
- 8)What are the Priority present in ALM/QC/Jira?Mantis/Backlog ?
- 9)What are the severity present in ALM/QC/Jira/Backlog/Mantis ?
- 10)Write defect report template in ALM/QC/Jira/Backlog/Mantis ?
- 11)How to create execution folder in ALM/QC/Test rail ?

Questions on Manual testing :

- 1)What is Functional testing ?
Explain.Example(2).Types.When ?
- 2)What is Integration testing ?
Explain.Example(2).Types.When ?
- 3)What is System testing ?
Explain.Example(2).When ?
- 4)What is Smoke testing ?
Explain.Example(2).Types.When ?
- 5)What is Adhoc testing ?
Explain.Example(2).Types.When ?
- 6)What is Compatibility testing ?
Explain.Example(2).When ?
- 7)What is Acceptance testing ?
Explain.Example(2).When ?
- 8)What is Exploratory testing ?
Explain.Example(2).When ?
- 9)What is Regression testing ?
Explain.Example(2).Types.When ?
- 10)What are the test case design techniques worked ?
Explain.Example(2)
- 11)What is Test plan and what was your contribution ?
- 12)How you did Impact analysis meeting in oyour company ?
- 13)How you did Scrum meeting in your company ?
- 14)Have you been part of handling escalation ?

- 15)Have you tested patches ?
- 16)If requirement changes does your test plan changes ?
- 17)If requirement changes does your scope of testing changes ?
- 18)How will you convince developer to fix defect ?
- 19)if developer tells its not a defect how will you convince him ?
- 20)What was your daily routine in your company ?
- 21)What was duration of Scrum/Impact analysis/Sprint plan/Bug triage/Retrospective meeting in your company?
- 22)Who were the part of Scrum/Impact analysis/Sprint plan/Bug triage/Retrospective meeting in your company?
- 23)Have you been part of Scrum/Impact analysis/Sprint plan/Bug triage/Retrospective meeting in your company?
- 24)How they handled escalation in your company ?
- 25)Who handled escalation in your company ?
- 26)If given chance customer is facing blocker or critical defect and if customer call is forwarded to you how will you handle it ?
- 27)If customer changes requirement on last moment of release how will you act in that situation ?
- 28)If given 100 testcases or execution in which order you will execute it ?
- 29)How you conducted bug triage meeting in company ?
- 30)What was your part in Scrum meeting ?
- 31)How you used to get communicated regarding build arrival ?
- 32)Whom you reported in company by EOD ?
- 33)How you gave KT for your juniors ?
- 34)How you got requirement in your company ?
- 35)How you judged priority for defects ?
- 36)Have you given any RFE's on project ?
- 37)How you reviewed test cases in your company ?
- 38)How you did Brainstorming meeting ?
- 39)How you made sure your test case coverage is good ?
- 40)Explain STLC ?
- 41)Explain SDLC ?
- 42)Explain Defect life cycle ?
- 43)If you been given software to test how will you test the software ?
- 44)What is Hotfix ?
- 45)Who installed build in your company ?
- 46)What were the challenges faced during manual testing ?
- 47)What are the reason for Bug leakage to production ?
- 48)ALL ISTQB question ?
- 49)Have you involved in preparing test report in your company ?
- 50)Can you list dependency modules present in your project ?
- 51)What are stubs and drivers ?
- 52)What is difference between Smoke and Sanity testing ?

- 53)How you invovled in doing Acceptance testing in Company ?
- 54)How you invovled in doing Usability testing in your company ?
- 55)When you did Impact analysis meeting in your company ?

Questions on SQL :

- 1)How you validated the test data ?
- 2)How you created test data ?
- 3)Name some of the tables in your project ?

Note : All questions needs to be answered based on your current project example.
